

Techno Sales Dashboard

Power BI Dashboard Project

Submitted By: Aadya Gupta
Internship: Hunar Intern

Dashboard Overview

This dashboard presents an interactive analysis of techno sales data using Power BI. Users can monitor sales performance by category, brand and state through interactive visuals.

Key Features

- Interactive Order Status Slicer
- Total Sales KPI Card
- Best Category & Top Brand Cards
- Category-wise Sales Bar Chart
- Brand-wise Sales Distribution Pie Chart
- State-wise Sales Distribution Map
- Key Insights Panel
- Professional 16:9 Dashboard Layout

DAX Function Used

Total Sales = SUM('Techno Sales'[Total_Sales])

Purpose: Calculates the total sales value displayed on the KPI card and used throughout the dashboard.

Creative Elements

- Corporate blue theme
- Rounded cards with shadows
- Consistent icon usage
- Interactive filtering
- Business-focused layout
- Clean typography

Conclusion

The dashboard transforms raw techno sales data into meaningful business insights. It enables users to evaluate category performance, brand contribution and regional sales efficiently through interactive Power BI visualizations.
